### GUIDELINES FOR REVIEWERS

*Dr. Shimeon Brisman, Editor, APPROBATIONS*

Book reviews are expected to include descriptions, evaluations, and critical comments (preferably in this order).

The descriptive part should acquaint the reader sufficiently with both the purpose and contents of the work. Data about the author, or additional information about the work (part of a series, illustrations, etc.), may be included in this part.

The evaluation of the material should consist of an objective examination of the contents, a spot checking of sources, and summarization of findings (whether the work meets the stated objectives of the author, whether the work meets scholarly standards, etc.). Critical comments pertaining to the technical aspects of the work (arrangement of material, order of chapters, bibliography, etc.) may be included in this section.

Basic criticism, including the reviewer's opinions and final judgment of the work, should be relegated to the end of the review.
